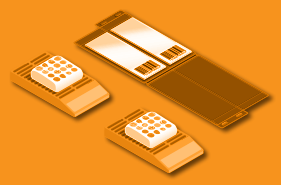
Healthcare Challenge 6 of 6: Control Your Specimen Storage Environment While Scaling for Growth

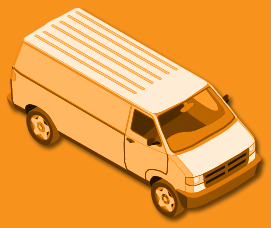
PUTTING PATHOLOGY IN ITS PLACE... BUT WHERE EXACTLY IS THAT?

It's not just paper records and digital data. Industry trends are causing an increase in the volume of slides and blocks laboratories must manage. With limited onsite space and resources, it is increasingly difficult for laboratories to scale onsite space to meet growing storage demands while also ensuring the proper environmental and access controls are in place to protect slides and blocks over the long term.



OFFSITE STORAGE

Preserve samples in secure, scalable and temperature- controlled offsite locations.



TRANSPORT

Leverage pathology-specific processes to ensure the safe handling and transport or specimens while utilizing real-time wireless scanning to maintain chain of custody every step of the way.

TRACKING

Find what you need when you need it at any time through a web-based portal.
