

Smooth shifts in auto lending performance

4 steps to streamlined automation

Right now, auto financing is bogged down by high costs, slow approvals, and too many costly manual errors. Companies are increasingly turning to end-to-end digitization and automation to meet customer demands and drive efficiency.

86% of financial services IT and line-of-business executives consider AI to be very or critically important to their business's success in the next two years¹

Shift gears to a more efficient auto loan process

Fully loaded features include:

-  Document scanning and digital content ingestion
-  Automated classification and extraction driven by AI/ML models with metadata
-  Automated workflow validation, notifications, and alerts
-  Secure physical and digital content storage with role-based access
-  Downstream distribution and integration to key stakeholders via appropriate APIs

Proof in the performance

|| With InSight, we have visibility into what's going on with our portfolios. From an effectiveness and efficiency standpoint, there is definitely a gain for both customer service as well as internal review. ||
